# **Profile**

Software engineer at the intersection of web development, data science and machine learning with a vast experience in Python, PHP, Linux and SQL for building data-driven applications.

# **Professional Experience**

#### **Software Developer,** SQM Research *⊘*

May 2022 - present | Sydney, Australia

- Implemented advanced stock recommendation tool for financial advisers
- Managed fleet of servers for data processing, API and hosting website
- Built data pipelines for property research, rental AVM, auctions.
- Worked extensively across all stacks (backend, frontend, system, database)
- Tech Stack: Python, PHP, MySQL, Linux, JavaScript

### **Software Developer,** Get My Course ∂

Jan 2018 – Feb 2022 | Remote

- Created automated workflows saving hours of manual research tasks
- Developed scraping scripts for lead generation, data deduping and cleaning
- Tech Stack: Python, MySQL, PostgreSQL, Selenium, Scrapy

## **Internship,** YoungInnovations Pvt. Ltd. ∂

Sep 2017 – Dec 2017 | Lalitpur, Nepal

- Worked on news aggregators, keyword based news classifier
- Tech Stack: Python, Django, Scrapy, MySQL, JavaScript

# **Education**

**Masters of Data Science,** Western Sydney University ∂

Mar 2022 - Jan 2024 | Sydney, Australia

- 6.188/7 GPA (Distinction)
- Predictive Analytics, Machine Learning, Hypothesis Testing, Probabilistic Models, AWS Cloud

# **BSc (Computer Science),** Tribhuvan University *∂*

Oct 2013 - Dec 2017 | Kathmandu, Nepal

- 75.43% (First Division)
- C, C++, Data Structure, Microprocessor, Cryptography, Database, Java, Data Mining

### Skills

Python, PHP, MySQL, PostgreSQL, Flask, Web Scraping, PyTorch, JavaScript, Pandas

# **Projects**

### **Analyzing Clinical Notes using Large language models**

- Using GPT 3.5 and LLAMA models for analyzing medical documents

# **Webpage Carbon Footprint Calculator**

- Calculating carbon footprint of a webpage based on page size and server location.

### Entry Level Remote Job 🔗

- Aggregates entry level remote jobs into a single portal.
